BRIEF DESCRIPTION OF THE PROJECT

White Creek Solar will construct the Facility in the Towns of Leicester and York, Livingston County. When completed, the Facility will have a total generating capacity of up to 135 megawatts (MW). In addition to photovoltaic (PV) solar arrays, the Project will include: racking support structures; direct current (DC) collection lines and communications cables connecting the arrays to inverters; the inverters with their support platforms, control electronics, and step-up transformers; buried alternating current (AC) medium voltage collection lines; security fencing and gates around each PV array; gravel access roads; temporary laydown areas; medium voltage to transmission voltage collection substation with associated equipment, and fenced areas; aboveground transmission voltage line to connect the collection substation to the point of interconnection (POI); POI switchyard; and operation and maintenance storage containers. The Permittee will also interconnect to the New York electrical grid via a new Point of Interconnection, located on Rochester Gas and Electric's 115 kV transmission line.

CONSTRUCTION SCHEDULE

Phase 1 of construction is scheduled to begin on or about January 19, 2026. Thereafter, construction will proceed according to the below phases and approximate schedule:

- Site Preparation in or around April 2026; and
- Civil Construction in or around July 2026.

All construction activities shall be limited to 7:00 a.m. to 8:00 p.m. Monday through Saturday and 8 a.m. to 8:00 p.m. on Sunday and on national holidays.
